THE RECORDER THAT DOES IT ALL.

The DM-4 delivers everything you expect from an Olympus audio recorder, and then some. With its incredible 8GB of internal memory, it supports over 2,000 hours of recording. It also supports Daisy — specialty software that converts audiobooks into speech for the blind. With voice command and a new visual index, this device does it all.

2,000
8GB

Recording Hours

Supports over 2000 hours of recording with 8GB internal memory. Also supports removable microSD media up to 16GB.

Multiple Recording Formats

Enables high quality recording in MP3, PCM and WMA formats; plays back in MP3, PCM, WMA and Audible file formats.

PC Link

Uploads files directly to your PC using a simple cable connection, while the USB 2.0 High-Speed Storage feature allows fast transfers and mass storage of files.

Full-Color Screen

Bright 2.2" color screen enables clear, easy navigation of menus and files.

Battery Charge Function

Charges the battery while connected to your PC. Long 20-hour battery life with lithium-ion rechargeable battery.

Capture It All.®
